## Join us for BOMEX® 2006...

Our theme this year "A New Energy" was selected to reflect not only the vibrancy of our host province, but also the abundance of energy in the commercial real estate industry in Canada.

BOMEX® 2006 will offer outstanding opportunities for personal and professional growth through valuable education sessions and networking opportunities.

The focus on Energy, is not only about issues of energy and conservation, sustainable buildings and environmentally sound building management. The theme also speaks to injecting energy in your career and your business, building an energetic workforce, and capitalizing on a new energy in Canada's economic outlook.

At BOMEX®, you will discover, discuss, analyze and debate the latest information and trends that fall in the broad scope of our industry. Many sessions will be eligible for CPD education credit and related associations' continuing education credits.
